

Junior Network Cyber Security

-SOC SIEM Analyst

Location: Wrocław

I work where
I am encouraged
to challenge the
status quo.

Discover what you can do at IBM.

What will you make with IBM?

The SIEM Analysts are responsible for providing IT security services to clients within the IBM Security Services (ISS) Managed Security Services organization. As a member of a team, or working independently, perform an analytical and technical role in implementation, integration, and delivery of technical IT security solutions, specifically SIEM Solutions, for clients. Using IT Security Industry experience, monitor client security systems and events to detect and investigate threats, and work regularly with client teams to enhance current solutions to improve client security posture. This often includes using tools and methods to analyze and customize client solutions.
